ENTRANCE AUTOMATION

PVC HIGH SPEED FOLDUP DOORS

Designed and manufactured by Smart India Enterprises (Smartie), our PVC fold-up doors represent the pinnacle of industrial entrance automation. These high-performance folding doors are specifically designed Industrial and commercial solutions, providing a seamless, high-security solution for demanding environments. Engineered with precision and craftsmanship, they offer a "bigger, better, faster, and stronger" approach to space management, ensuring operational efficiency without compromising on aesthetic appeal. Whether for industrial or commercial use, our PVC fold-up doors are built to the highest standards,

Sealing: Use of U-shaped airbag cloth pockets at the bottom for uneven ground and double-row brush seals on the sides of the door frame.

Fabric: High-strength PVC coated fabric (typically 0.8mm to 1.5mm thickness).

Speed: High-speed operation (0.8m–1.5m/sec) to minimize exposure time.

Safety Devices: Standard infrared photoelectric protection, emergency stop buttons, and pressure airbags.
